

# CUMC LIBRARY & COMPUTING NEWS

Augustus C. Long Health Sciences Library  
Columbia University Medical Center

VOLUME 13, NUMBER 7/8  
JULY/AUGUST 2014

AMAZING THINGS ARE HAPPENING HERE!

## RESOURCE SPOTLIGHT

## EMBASE - YOU ASKED FOR IT, WE GOT IT!

### Journal Citation Reports®

JCR is the main resource for information on the ranking of journals in various disciplines based on citation impact factor.

This service, which is part of Web of Science, has a completely new interface with additional features.

To access JCR:

- Go to Web of Science at:  
<http://www.columbia.edu/cgi-bin/cul/resolve?clio2054244>
- Click on the Journal Citation Reports link on top of the screen.

You may find video tutorials at:  
[http://wokinfo.com/training\\_support/training/journal-citation-reports/](http://wokinfo.com/training_support/training/journal-citation-reports/)

Questions? Please contact us at:  
[hs-library@columbia.edu](mailto:hs-library@columbia.edu)

### SUMMER HOURS

Are in effect starting on June 11.  
Learn more at:  
<http://tinyurl.com/podvg6v>

EMBASE is a multipurpose database covering over 28 million records from international biomedical literature from 1947 to the present, including all of MEDLINE. The 8,300+ journals are from over 90 countries, including 2,500 journals unique to EMBASE. Search using over 270,000 EMTree terms, including drug information. EMBASE is an integral component of conducting thorough systematic reviews and literature searches.

Check our Web site for upcoming EMBASE training workshops in the fall. In the meantime, you may find FAQs, guides, and video tutorials at:

<http://www.elsevier.com/online-tools/embase/training-and-support#guides-and-manuals>

You may search EMBASE here:  
<http://www.columbia.edu/cgi-bin/cul/resolve?clio10876993>

## JOANNA BRIGGS INSTITUTE EBP DATABASE

The Health Sciences Library is pleased to announce the addition of the *Joanna Briggs Institute EBP Database* to our collection. JBI provides summarized and appraised evidence in the form of systematic reviews and protocols, recommended practices, best practices information sheets, consumer information sheets, and evidence summaries. "This comprehensive database covers a wide range of medical, nursing, and health science specialties and includes a unique suite of information that's been analyzed, appraised, and prepared by expert reviewers at JBI." (From OVID Website: <http://www.ovid.com/site/catalog/databases/11299.jsp>.)

Also included in this resource are a variety of Evidence Based Tools, such as JBI's tool for appraising systematic reviews, SUMARI. To start using these tools login with your OVID account\* to 'My Account' in the upper right and then select 'EBP Tools' from the main menu dropdown. \*Note - this can be the same account you login with on other OVID resources such as OVID MEDLINE and PsycINFO. See: <http://tiny.cc/7k0tjx>

Image- The JBI Model -  
<http://joannabriggs.org/jbi-approach.html>

Learn more about the JBI approach at:  
<http://joannabriggs.org/jbi-approach.html>

Check our Web site for upcoming introductory sessions on evidence-based practice.

## WHAT END OF SUPPORT OF WINDOWS 7 REALLY MEANS

Microsoft's announcement that mainstream support for Windows 7 will end in January 2015 threw many into a panic. The end of extended support for Windows XP being fresh on everyone's mind may have caused some of the alarm, making it important to distinguish between the somewhat confusing terminology.

**Mainstream Support** means that Microsoft is releasing new features and Service Packs, which are bundles of updates that can include tweaks to the operating system's interface.

**Extended Support** means that Microsoft continues to patch security flaws and performance issues.

There are other fine differences such as availability of free online support and continued sales of the OS that are outlined in the Support Lifecycle website: <http://support.microsoft.com/lifecycle/>.

One thing you should do before January is have Service Pack 1 installed on your computer, and be sure to install any new Service Packs that Microsoft may release.

## STUDENT PERKS

Have you taken advantage of all of the technology perks CUMC offers? Here is a quick list in case you didn't know:

- Free loaner laptops from the kiosk on the 2<sup>nd</sup> floor of Hammer Building: <http://cumc.columbia.edu/its/laptops.html>
- Discounts on computers and other equipment, as well as recommended hardware configurations: <http://www.cumc.columbia.edu/it/students/computers-software.html>
- Free and discounted software programs via the same link above
- Free equipment engraving and security programs: [http://www.cumc.columbia.edu/it/getting\\_started/physical\\_security.html](http://www.cumc.columbia.edu/it/getting_started/physical_security.html) and [http://www.cumc.columbia.edu/it/getting\\_started/phone.html](http://www.cumc.columbia.edu/it/getting_started/phone.html)
- Free help for learning software programs and many other IT related topics via classes, videos, and e-books by top authors: [http://www.cumc.columbia.edu/it/getting\\_help/classes.html](http://www.cumc.columbia.edu/it/getting_help/classes.html)

Many more resources are listed on our website, and we always welcome suggestions. Please email [5help@columbia.edu](mailto:5help@columbia.edu) with your questions and comments.

## KNOW WHAT QUALIFIES AS PHI & PII

If you are unsure of the specific forms of information that are protected by HIPAA, HITECH and other regulatory acts, see our Identifying PHI and PII section on the Encryption Best Practices page. It includes some examples as well as the full list of 18 PHI identifiers:

<http://cumc.columbia.edu/it/howto/encrypt/bestprts.html#phippii>

If you have already taken online Security and Privacy Training courses they can still be reviewed by logging in again with your Columbia UNI and password. Details are at:

[http://cumc.columbia.edu/it/security\\_training.html](http://cumc.columbia.edu/it/security_training.html).

We will be publishing more help on using encryption programs soon, including setting up Windows BitLocker to use stronger encryption methods and using recovery keys in both BitLocker and Macintosh's native FileVault program.
